

TV ANYWHERE™

watch TV wherever you want

PROFESSIONAL

Sharp images and perfect sound.

*Connects directly to the antenna socket;
built-in TV tuner.*

*Watch TV anywhere in your home without
having to lay extra coax cables.*

MARMITEK®

TV ANYWHERE

- The first 'wireless antenna box' on the market.
- Watch your favourite TV programmes wherever you want, in any room or even in the garden. You are not dependent on antenna sockets or coaxcables.
- Channels can be easily put in your favourite channel order.
- Perfect images and sound, wirelessly through walls and ceilings.
- Also suitable for wireless transmission of images and stereo sound from your DVD player, VCR or satellite receiver.
- Including 6in1 multifunctional remote control for use with the TV Anywhere, but which is also suitable for your TV, DVD player, VCR and satellite receiver. This signal also goes through walls and ceilings!
- Use of several receivers is possible. Note: all receivers receive the same channels.

HOW DOES IT WORK?

Very easy. You just connect the TV Anywhere directly to your antenna box. The built-in tuner (in the transmitter) saves all available TV channels in the memory. The receiver is then connected to a TV; wherever you want. The transmitter is wirelessly connected (even through floors and ceilings) to the receiver, which you connect to your TV. Aim the included TV Anywhere remote control at your receiver and select the channel you want to watch, from wherever you are watching TV at that moment in time.

TECHNICAL DATA

Power (including adapters):	230VAC/50Hz, 12 VDC.
Transmitter and receiver:	2.4GHz - 4 channels.
